

MagSense reduces truck parking chaos

MagSense allows...

- efficient truck parking space management
- settling the hazardous „parking chaos“
- well-directed guidance to vacant parking spaces
- using even the very last vacant parking space
- utilizing the maximum capacity of a parking facility
- creating additional parking space without high investments
- safe parking on all rest areas
- a trouble-free realization even with a very low budget with the „Buy data not sensors“ model (see rear page)...

before

after

MagSense

Buy data not sensors...

You: design your parking facility

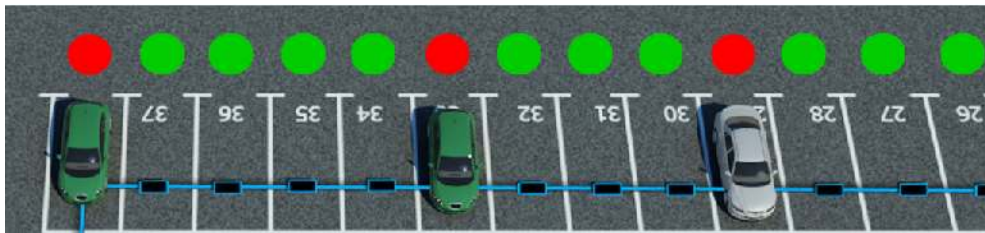

We: install the Magsense system,
at no charge for you

You: save your budget

We: provide all required resources
and IT infrastructure, including server

You: buy the current occupancy data

You: run no IT security risk from connecting to an external
IT infrastructure

You: can use your budget for other projects

You: can focus on the essential and buy the occupancy data
at low price and no risk

We: run the system including updates and maintenance and
bear all operating risks
